

CHEMICAL POLICY

Kids' safety is at the very heart of what we do. We want every Petit Crabe child to go on outside adventures, whilst keeping their sensitive skin happy and healthy.

That's why we stand firmly on guard against any chemical nasties that might contaminate our fabric.

Thankfully the EU has very comprehensive legal guidelines on harmful chemicals in textiles, called REACH. All of our garments are produced in alignment with REACH, which is constantly updated alongside cutting-edge science.

Our clothes are also OEKOTEX 100 certified, a very strict certification. thereby making sure that absolutely nothing unwelcome reaches the skin of a child.

Find more detailed information in the Code of Conduct, which our suppliers are obliged to follow, by clicking [here](#).
